MONTHLY/QUARTERLY REPORTS:

U.S. BUREAU OF RECLAMATION REPORT

Roy Vaughan provided a PowerPoint presentation reviewing the following:

- As of November 16, 2015 there were 184,828 acre-feet stored in Pueblo Reservoir; 113,751 acre-feet of Project water; 45,667 acre-feet of Excess Capacity water; 23,416 acre-feet of Winter water.
- There is currently 131,622 acre-feet of Project space in Pueblo Reservoir and 13,504 acre-feet of space in Turquoise and Twin Lakes Reservoirs.
- Project Reservoirs: Turquoise 106%; Twin Lakes 101%; Pueblo 134%
- Boustead Imports 72,206 acre-feet
- Storage Capacity and Remaining Storage

Mr. Vaughan reported the collection system has been shut down and is being winterized and the Mt. Elbert Conduit is currently running 250 cfs. Reclamation is moving 225 cfs. to Pueblo Reservoir and plans on moving an additional 52,000 acre-feet from the upper reservoirs. Movement of water will be adjusted according to the forecast and customer's needs.

Mr. Broderick reported Garrett Markus, Pat Edelmann, Roy Vaughan, and he met with the U.S. Army Corps of Engineers in Albuquerque to discuss a deviation of the conservation pool. The U.S. Army Corps of Engineers declined to approve a deviation of the amount of water that could be stored in the conservation pool.

DIVISION ENGINEER'S REPORT

Mr. Witte reported on the following:

- River and Reservoir Report
 - Reference Arkansas River Daily Report. River Call is
 - 3/1/1910 Winter Water Storage Program
 - 5/31/1949 Compact Call

RECORD OF PROCEEDING

- Current River/Reservoir Operations
 - Winter Water Storage
 - Fort Lyon and Amity Substitute Water Supply Plan operations
 - John Martin Storage
 - Excess diversions by Las Animas Consolidated Canal Company prior to November 15, 2015 have complicated the Section III / Conservation Storage determination that normally rely on stable flows for the purpose of establishing the Conservation Storage base flow. Base flow will be adjusted to benefit John Martin Conservation Storage and result in a smaller Winter water total system.
 - Nineteen cfs base flow (2013), 30 cfs base flow (2014) vs 90 cfs base flow (2015)
- Compact Issues
 - Began storing inflow to John Martin on November 1, 2015
 - ARCA will meet in Garden City, KS on Thursday, December 10, 2015 at the Clarion Inn, 1911 E. Kansas Ave. Committee meetings will be on the day before.
 - 1)The continuing concern related to the procedure used to determine the portion of John Martin inflow that is credited to the Winter Water Storage interests from that which is credited to Compact conservation storage, 2) resolution to amend Section III A. of the 1980 Operating Resolution, 3) Colorado Parks and Wildlife's initiative to secure approval for an additional source of water for the Permanent Pool.

U.S. GEOLOGICAL SURVEY REPORT

Bill Banks presented a PowerPoint titled, *Summary of Hydrologic Conditions in the Arkansas River Basin*, reviewing the following:

- Map of 28-Day Average Streamflow Compared to Historical Streamflow for the Day of the Year, Tuesday, November 17, 2015
- Streamflow (in cfs) November 18, 2015
- Duration Hydrograph Arkansas River Near Leadville
- Duration Hydrograph Arkansas River Near Avondale
- Cumulative Hydrograph Arkansas River Near Leadville
- USGS Publications Warehouse (pubs.er.usgs.gov)

STATE LEGISLATION UPDATE

Lee Miller reported at the October 29, 2015 meeting, none of the proposed legislation obtained the necessary "super majority" to move forward as a bill recommended by the Water Resources Review Committee (WRRC). The WRRC did adopt three resolutions for consideration by the General Assembly during the 2016 session.

RECORD OF PROCEEDING

Proposed Legislation		
Bill Designation	Bill Topic	Former Bill Designation
Resolution A	Good Samaritan Remediation Abandoned Mines	Resolution 6
Resolution B	Federal Funding for Catastrophic Wildfire	Resolution 3
Resolution C	Timely Access to Federal Lands for Dam Restoration Projects	Resolution 2

One other note of interest from the October 29 WRRC meeting, Lower Arkansas Valley Water Conservancy District (Lower Ark) General Manager Jay Winner and Special Counsel Leah Martinsson testified regarding their intent to propose new water banking legislation during the upcoming session. Details on the Lower Ark bill proposal were sparse, but they had several criticisms of the existing water bank statute. As you may recall, the existing water bank statute was an initiative of Steve Arveschoug, during his time as District general manager. We understand that Lower Ark is working with Representative Jenny Arndt from Larimer County on the legislative proposal. When we have additional information on the water bank proposal, we will bring that information to the Board.

Lee Miller said Colorado’s Water Plan will be approved and presented to the Governor today, November 19, 2015, in Denver.

Some of the discussions in the Colorado Water Conservation Board staff’s Action Report are:

- “The final version of the plan, building on comments across interests and geography, includes a set of measurable objectives that help us move forward together and provides goals Colorado must meet regarding water for farms, for the environment, and for cities and industries.
- “Those goals include numerical benchmarks of 400,000 acre feet for both urban conservation and new storage by 2050; identifying 50,000 acre-feet of agricultural water for voluntary alternative transfers that do not result in permanent dry up of farmland; having 75 percent of the state’s population reside within communities that have incorporated water saving options by 2025, and extending management plans to cover 80 percent of locally prioritized streams and watersheds by 2030.
- “Colorado’s Water Plan doesn’t prescribe specific projects. Instead it outlines how various interests across basins can attain locally driven, collaborative solutions, and how balanced approaches can garner the broad support needed to accelerate projects and shorten the federal regulatory process often associated with water-related actions in Colorado.
- “The Plan will honor and respect Colorado water law and continue to rely on the Doctrine of Prior Appropriation, an approach that has guided water use in our state since its earliest days.
- “It safeguards Colorado’s water by vigilantly protecting our interstate compacts and decrees. These provide certainty to Colorado – and our neighbors – on allocation of supplies.

RECORD OF PROCEEDING

- “At the same time, Colorado’s Water Plan avoids dogmatic thinking, and encourages openness to new opportunities to evaluate and strengthen our water laws so we are better positioned to meet our needs and incorporates Colorado’s values.”
