

# 2022 Business Plan (2022-2024)

#### **2022 BUSINESS PLAN/INTRODUCTION**

#### 1958

The Southeastern Colorado Water Conservancy District was formed for the primary purpose of forming and operating the Fryingpan-Arkansas Project.

#### 1962

The Fry-Ark Project was approved by Congress.

#### 1981

Repayment Contract for Project signed with the Bureau of Reclamation.

#### 1995

The District formed an Enterprise Activity. The Enterprise is the business arm of the District.

#### 2020

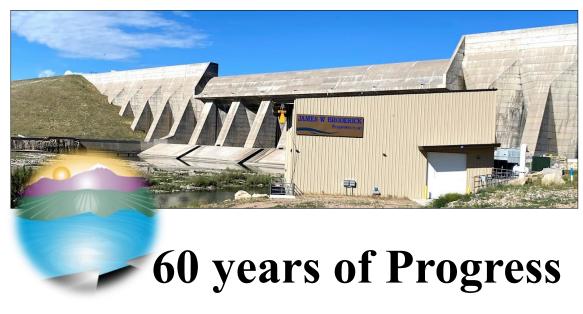

Hydroelectric Power subfund created in the Enterprise Budget.

#### 2021

Arkansas Valley Conduit subfund created in the Enterprise Budget.

#### 2021

Repayment Contract conversion signed.

The Fryingpan-Arkansas Project will be 60 years in the making in 2022, and the challenged not only with being the careprogress that was envisioned in the middle of the previous century is starting to unfold.

"Water time" is a way of looking at things that measures accomplishments by generations, rather than just years.

In the case of the Fryingpan-Arkansas Project, a generation that witnessed the powerful destruction of floods, and the horrifying consequences of drought dreamed of a future where the blows of these events could be softened. Control of the water by storage and improved supply during the dry times were the goals.

The next generation arrived after World War II, with a can-do attitude to build a project that would meet these goals. They formed the Southeastern Colorado Water Conservancy District to be stewards of a precious resource; to develop the Fryingpan-Arkansas Project.

Then came the builders. Decades were spent creating the dams, tunnels and hydropower plants that make up the infrastructure of the Fryingpan-Arkansas Project.

In 2022, the Southeastern District is takers of this wondrous legacy, but to use the same sort of vision as previous generations to continue to improve and develop the Project for the benefit of Southern Colorado.

The 2022 Business Plan is a roadmap for meeting this challenge. This year's plan looks at work that is anticipated in the next three years, and includes a section that anticipates projects that are the horizon beyond that three-year window. It is meant to be a forward-looking document that captures the essence of operations, programs and projects that meet the purposes of the District and the Project.

The Business Plan aligns with the 2022 Strategic Plan and will follow the fund structure used in the 2022 Budget.

Expenditures listed in the Business Plan for 2022 align with the Budget, while years 2023 and 2024 are Advisory Years and are subject to change.

Finally, potential future programs are listed in the 2022 Business Plan, as a reminder of work yet to be completed for generations to come.

## **2022 BUSINESS PLAN/INTRODUCTION**

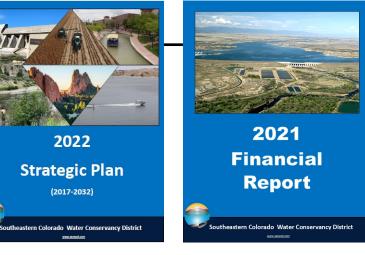

# **Measuring Progress in 2021**

Fryingpan-Arkansas Project	Lead Office (s)	Description/Goals	2021 Progress	2022 Target
Repayment Contract	Finance/Legal	Repay Fry-Ark Debt	83%	85%
Operation, Maintenance & Replacement	Finance	Payments for District Share	100%	100%
OM&R Credits	Finance	Credit to District OM&R	100%	100%
Fryingpan-Arkansas Reserve Fund	Finance	Increase Fund Balance	100%	100%
Miscellaneous Revenues	Finance	Reclamation Fund for AVC	100%	100%
Excess Capacity Master Contract	Programs	Contract for Pueblo Reservoir Accounts	100%	100%
Winter Water	Engineering Water Resources	Coordinate Winter Water Storage	100%	100%
Reclamation Reform Act	Engineering Water Resources	Track Irrigated Acres	100%	100%
District Operations	Lead Office (s)	Description/Goals	2021 Progress	2022 Target
Human Resources	Administration	Transitional Planning and Stability	90%	100%
District Headquarters	Administration	Maintain District Building	100%	100%
District Grounds	Administration	Maintain District grounds	75%	100%
Records Management	Communications	Develop Electronic Filing System	5%	25%
Fleet Management	Administration	3 Vehicles, 6-Year Rotation	100%	100%
Boundaries & Inclusion	Engineering Water Resources	Accurate Boundaries & Inclusions	80%	100%
Water Rights Protection	Legal	Diligence, Protection of Water Rights	100%	100%
Outside & Professional Services	Administration	Outside help for all areas	75%	100%
Water Conservation & Education	Communications	Conservation Planning in 2022	50%	100%
Communications & Outreach	Communications	Develop Communication Plan	50%	100%
Financial Study	Finance	Financial Study in 2022	50%	100%

Completion
Implementation
Design
Planning

This chart shows the progress of Business Plan elements according to the office of primary responsibility. In general, most projects, programs and operations overlap and interact.

# Using the 2022 Business Plan

The 2022 Business Plan is meant to align with the 2022 Adopted Budget, the 2022 Strategic Plan and the 2021 Financial Report. The Business Plan is a three-year roadmap that looks at what is expected to occur in the near future, while evaluating how programs fit with the long-term goals of the Strategic Plan, the annual workplan as described in the Budget, and the financial review of the previous year in the Financial Report.

In the 2022 Business Plan, a three-year work plan is included in the Executive Summary that highlights activities by department.

All programs, projects and activities are individually described in the section immediately following the Executive Summary.

The Business Plan concludes with the threeyear budget and forecast.

# **Legal Department**

# **USBR Contracts**

#### Fry-Ark Repayment Contract

The Fryingpan-Arkansas Project converted Repayment Contract between Reclamation and the District was signed in late 2021. It establishes District repayment, OM&R, and use of Fry-Ark revenues in perpetuity.

#### **Three-Party AVC Contract**

A contract among Reclamation, the District and Pueblo Water was negotiated in late 2021, and will be signed in 2022. It established payments and conditions for the Arkansas Valley Conduit.

#### **AVC Repayment Contract**

The Arkansas Valley Conduit Repayment Contract between Reclamation and the District establishes payment of the District's 35% share of the AVC, and operating conditions.

#### Fountain Valley Authority Contract

The Fountain Valley Authority repaid its debt to Reclamation in 2021. The Authority contract through SECWCD expires in 2024, and must be renewed before that time.

#### **Water Court**

#### **Division 2 Diligence Filings**

Diligence filings for water storage, conveyance, diversions and exchanges in the Arkansas River basin will be made in 2022.

#### **Water Court Cases**

Water cases will continue to be monitored in Division 2 water court, and throughout other divisions in Colorado, to determine whether Fry-Ark Project water rights could be impacted. No major cases are foreseen.

#### **Division 5 Diligence Filings**

Diligence filings for water diversions and conveyance in the Colorado River basin will be made in 2024.

#### **Colorado River**

#### **Colorado River Issues**

Legal staff will continue to monitor Colorado River issues that involve partnerships within Colorado, among Upper Basin states, and among Lower Basin states, including tribes.

# **AVC Agreements**

#### **AVC Governance Agreement**

A governance agreement for the Arkansas Valley Conduit will be needed in early 2022. The agreement will set the format for future OM&R and financial decisions that will be needed when the AVC is built.

#### **Fiscal Agent Agreement**

A fiscal agent is needed in order to accept grants for the AVC that exceed the SECWCD Enterprise limits under state law, and for smaller water companies that are not eligible for government funding. The fiscal agent might also assume other financial functions related to AVC. This needs to be in place in early 2022.

#### **AVC Participant Agreements**

Agreements for delivery and excess capacity storage (in most cases) between SECWCD and participants will be needed as participants come on-line. In 2022, this includes Avondale and Boone.

#### Legislation

#### Colorado Water Conservation Board AVC Package

Once a fiscal agent is determined for AVC, legislation will be needed to modify the \$100 million finance package approved by the state in 2020 to allow grants to be accepted by the fiscal agent on AVC's behalf.

#### **Monitor State Legislation**

SECWCD legal staff will monitor state legislation for action that affects the Fry-Ark Project, the District or the Enterprise.

#### **Other Issues**

#### **Conflict of Interest**

Conflict of interest policies for staff, Board members and contractors will be reviewed in 2022.

#### **Succession Planning**

An in-house lawyer will be added during this three-year planning window to assure that there is no gap in legal services during transition of current staff.

#### Administration

## **Human Resources**

#### **Salary Survey**

Salary surveys are done every three years to align SECWCD salaries with similar agencies throughout the region. In 2022 there will be a salary survey completed, but no benefit survey.

#### **Human Resources Manual**

The SECWCD Human Resources Manual will be reviewed and updated in 2022.

#### **New Staff Positions**

New staff positions are needed in the following areas:

- 1) Legal department (succession planning)
- 2) Engineering (workflow management)
- 3) Arkansas Valley Conduit (increased workload)
- 4) Gardener (part-time)

# **Technology**

#### **Records Management**

For several years, the District has been looking at a way to digitalize existing documents, and store new documents in a way that would allow easier access. In 2022, options will be reviewed with the goal of beginning implementation.

#### **OnBoard Development**

The District will continue to develop improvements for the OnBoard software used for meetings. In 2020, the District chose OnBoard as the software that would be used for virtual meetings. In 2021, the District purchased electronic tablets for Board members to conveniently access OnBoard. When hybrid meetings became possible, OnBoard allowed Board members to access meeting documents electronically. In 2022 and beyond, the District will continue to fully integrate OnBoard as a hybrid meeting platform.

#### **Board Room, Executive Conference Room Upgrades**

Audio and visual features of the Board Room and Executive Conference Room need to be optimized for either virtual or in -person meetings. Work began on improvements in 2019, but was interrupted by pandemic restrictions. After nearly two years of virtual or hybrid meetings, the parameters for the upgrades have become clearer.

# Headquarters

#### Air Conditioning & Heating

The air conditioning units were installed at the same time the building was construction in 2000, or when the addition was built in 2004. One of the five units failed in 2021, so replacement is imminent. Two units will be replaced in 2022, and the others within the three-year period.

#### **Landscape Demonstration Project**

A landscape demonstration project is planned for the northeast corner of the building in 2022. The project has a dual purpose of stabilizing the headquarters foundation.

#### Fleet Management

Purchase of a new vehicle for the District was delayed during the pandemic because of reduced travel. A new vehicle is scheduled for purchase in 2022.

# Grounds

#### Landscape Master Plan

Several signs in the outdoor garden area were updated in 2021. An outdoor landscaping service was hired to maintain the three-acre lot. There were some volunteer work days by the Pueblo Master Gardeners. What is needed in 2022 is a comprehensive master plan for landscape to be implanted in the upcoming three-year period.

# Finance Department

# **Annual Processes**

#### Year-end balances

Year end balances for 2021 are determined in January 2022.

#### **Budget Publications**

The published 2022 Budget, Business Plan and Strategic Plan will be reviewed in January and February.

#### **Annual Audit**

The annual audit will be in February and March.

#### **Preliminary Budget For Modeling**

Cost of service and rate design models will be run during April and May.

#### **Proposed Rate Schedule**

A rate schedule will be proposed in the June-July time frame with stakeholder outreach if changes are likely.

#### **Financial Studies**

#### Three-Year Financial Study

The 2019 Financial Study recommended a three-year cost-ofservice and rate study. This study will begin in April, with the goal of completion in August.

#### **Past Financial Study Issues**

The issues of surcharges and the structure of reserve funds were addressed in the 2019 Financial Study and will require Board attention during this three-year period.

#### **Investment Policy**

The investment policy will be reviewed and updated in 2022.

#### Finance Manual

The finance manual will be reviewed and updated in 2022.

# **Hydropower**

#### Colorado Water Conservation Board Loan Closure

Loan closure for the \$17.2 million CWCB loan to help build the James W. Broderick Hydropower Plant is projected to be toward the end of 2022, after mechanical plugs required by the Lease of Power Privilege with Reclamation are manufactured and delivered.

# 2023 Budget Steps

#### **Budget Call**

The Executive Director and Budget Officer meet with department heads in July to discuss budget submissions in July 2022.

#### **Staff Input**

Staff input is collected by the Budget Officer during September. Financial information, goals and objectives are assembled into one document.

#### **Review and Approval**

The Executive Director and Budget Officer meet on each section of the budget to discuss changes. A final review is provided to the Board of Directors no later than October 15.

#### **Public Presentation**

A public presentation of the budget will be made in November, and a public hearing on the budget is conducted at the November Board meeting.

#### **Budget Adoption**

Any changes in the budget are disclosed to the Board of Directors. The Directors will vote to adopt the budget in December. The budget will be adjusted according to final tax assessment information from all nine counties within the District. A full budget publication will be provided to the Colorado Department of Local Affairs by January 31, 2023.

# **Arkansas Valley Conduit**

#### **Fiscal Agent**

A fiscal agent will be chosen to allow for the acceptance of large grants beyond the capacity of the Enterprise, and for water companies that are not publicly incorporated.

#### Governance

The Enterprise Board will enter agreements for governance of AVC finances, OM&R and contractual obligations.

# **Capital Projects**

#### Restoration of Yield (ROY)

The Enterprise is a partner in the ROY program that is building a reservoir near Boone. In 2021, \$150,000 (SECWCD's share) was paid to purchase the land. The reservoir will be built in about 10 years, and \$200,000 set aside annually will fund SECWCD's share of construction costs.

# **Engineering/Planning and Development**

# **Condition Assessment**

#### Fryingpan-Arkansas Feature Evaluation

In 2020, the District hired Providence Investment Consultants to study Fry-Ark features in order to assign present-day values, and to rate features for longevity and risk factors. The study was completed in 2021.

#### Fryingpan-Arkansas Condition Assessment

The next phase of the project will be to assess the condition of the Fry-Ark features, in order to establish the need for reserves in future years.

#### District, Enterprise Evaluation and Condition Assessment

The District's headquarters and the Enterprise's James W. Broderick Hydropower Plant were included in the Providence study as well. Replacement schedules are used in the Capital Improvement Plan.

# **Recovery of Storage**

#### **Pueblo Reservoir Evaluation**

Mott MacDonald was hired in 2020 to evaluate the rate of sedimentation at Pueblo Reservoir and determine what methods would be most useful in recovering storage. Phase I of the study developed costs for dredging or dam enlargement, the two most feasible methods. Phase II began in 2021, and looks at prevention of future loss and impacts on storage. Recommendations for 2022 are to study upstream sources of sedimentation for possible remediation.

# **Storage Options**

#### **Upper Arkansas Storage Project**

The District has budgeted funds for participation in an underground, multipurpose storage project in the Upper Arkansas River basin. The project is being spearheaded by the Upper Arkansas Water Conservancy District and has not moved for several years.

#### John Martin Storage Project

The Colorado Division of Water Resources continues to investigate the possibility of excess capacity storage in John Martin Reservoir. While the project could be useful to SECWCD, no progress has been made for several years.

# **Basin Partnerships**

#### **Regional Resource Planning Group**

The Regional Resource Planning Group last met in 2018, following 15 years of planning water quality studies on the Arkansas River. The group will meet in 2022 to discuss active monitoring of baseline water quality,

#### **Arkansas River Contingency Planning**

SECWCD has initiated discussions with Front Range Water Council partners in the Arkansas River basin on how entities would react and assist each other during prolonged periods of decreased or increased water supply, whether from reduced imports or native water flows. Those discussions will continue in 2022.

#### Restoration of Yield

The District is a partner with signatories of a 2004 agreement that allows bypassed flows through Pueblo to be recaptured downstream and exchanged. Land near Boone was purchased for a reservoir in 2021, but the reservoir is not likely to be built for about 10 years.

#### **Voluntary Flow Management Program**

The District participates in a program that optimizes flows above Pueblo Reservoir for both recreation and fish habitat. District staff will continue to meet regularly with program participants to review the program.

#### **Aquatic Nuisance Species Control**

In 2022, the District will continue to help fund boat inspections during winter months to reduce the threat of aquatic nuisance species at Pueblo Reservoir.

# **Water Efficiency**

#### **Hydrologic Variability**

The District will continue looking at ways to more accurately forecast water conditions, and reviewing the impacts of dry, average and wet years on Project and non-Project water supply.

#### **Acquiring New Water**

The District has the ability to acquire new water rights, but has never used it. The Board has the option to employ this strategy during water-short periods.

# **Engineering/Water Resources**

# **Operations**

#### Water Allocation

In 2022, water will be allocated according to the Allocation Principles and Policies of the District. Water is allocated according to Reclamation's May 1 forecast of imports from the Fryingpan River basin. The Enterprise collects payments, and the rate for water sales will not change from 2021. In 2021, imports totaled 30,880 acre-feet (64% of average), producing 25,544 acre-feet of allocations, and 4,130 acre-feet of return flows.

#### **Pueblo Reservoir Storage**

The Enterprise collects surcharges on storage of municipal carryover of Project Water in Pueblo Reservoir. Space is specified under Allocation Principles and District policy. The 2019 Financial Study suggested charges for carryover storage, but no Board action has been taken. Surcharges are collected on other types of water storage in Pueblo Reservoir.

#### **Excess Capacity Master Contract**

The District contracts with Reclamation for excess capacity storage in Pueblo Reservoir on behalf of stakeholders. Contracted storage in 2022 will be 6,595 acre-feet at \$43.76 per acre-foot. Payments are passed through to Reclamation.

#### **USGS Joint Funding Agreement**

The U.S. Geological Survey monitors water quality at sites on the Arkansas River and key tributaries. The Enterprise collects payments from Enlargement, Excess Capacity, and Arkansas Valley Conduit participants through quarterly billings.

#### Reclamation Reform Act

The District monitors farm size to comply with the Reclamation Reform Act. An audit is scheduled to resume in 2022, after delays in 2020 and 2021 caused by the pandemic.

#### Fountain Creek Transit Loss Model

The District participates with Fountain Creek water users (both within and outside the District) to account for Project Water return flows on Fountain Creek. Payments for return flows could accrue in 2022, which would be paid in 2023.

#### Winter Water

The District hosts the annual meeting of Winter Water participants each year in October, to review the operations of the previous water year (October 1-September 30)

# **Programs**

#### **Boundaries and Inclusion**

In 2022, the District continue to "true up" boundaries as a result of municipal annexations, and include some landowners by petition. Wilson Water Group assisted the District in defining the boundaries via GIS in recent years.

#### Water Resources Monitoring

In 2022, the District will continue to monitor water resources by tracking snowpack, reservoir levels, streamflow, precipitation, and drought conditions. The District works in partnership with other agencies and stakeholders to identify conditions and management strategies throughout the year.

#### **Arkansas Valley Weather Stations**

The District will support the Colorado State University CO-AgMet weather monitoring program in the Arkansas River Basin. The program monitors temperature, wind, crop water use and evapotranspiration at weather stations at sites along the Arkansas River from Salida to the Kansas state line. The Upper Arkansas Water Conservancy District is the lead agency in the Arkansas Valley.

#### Weather Modification

The District is a participant in the Colorado Water Conservation Board's Colorado River basin weather modification program. The program uses cloud-seeding as a strategy to increase snowpack. Participants include West Slope interests and Front Range water importers.

# **Pilot Program**

#### Agricultural First Right of Refusal/Return Flow Policy

The District hosted meetings in December to discuss changes in the Return Flow Policy that resulted from the Agricultural First Right of Refusal Pilot Program, which started in 2014. The program developed a method for ditch companies to claim their own return flows for both surface water (Rule 10) and groundwater (Rule 14) augmentation. The changes to the Return Flow Policy will affect only agricultural water users east of Pueblo, although parts of the policy have been more logically rearranged. They establish administration by farm unit based on the differing needs of Rule 10 and Rule 14, establishing equity for these uses. The Board is expected to vote on the revised Return Flow Policy in March.

# **Arkansas Valley Conduit**

# **Funding**

#### Federal Infrastructure Funding

The District will continue to seek funding from the Infrastructure Investment and Jobs Act passed in 2021. The act provides \$55 billion for drinking water, with some of those funds dedicated to Reclamation projects such as the Arkansas Valley Conduit (AVC). This money would fund the federal portion of the AVC, and the goal is to accelerate construction to complete the AVC by 2029, rather than 2035.

#### **American Rescue Plan**

The American Rescue Plan Act provided money to municipalities and counties. The District met with all AVC incorporated participants and counties in 2021 to request the use of these funds for planning and/or construction of the Enterprise portion of AVC (delivery lines and spurs).

#### **Federal Appropriations**

The District will support line-item funding in the federal budget for AVC in 2022.

#### Colorado Water Conservation Board (CWCB)

Funding from the CWCB \$100 million finance package will be accessed in late 2022 or early 2023. The Enterprise will need to establish a fiscal agent to accept grants in excess of constitutional limits. If the AVC plan is accelerated CWCB loan money will be needed by as soon as 2023 to complete design and begin construction.

#### **Other Funding Sources**

The Enterprise will work to establish where other funding can be applied to AVC in 2022. Funds from the Colorado Water Resources and Power Development Authority are available for AVC participants. There may also be USDA rural development and Community Development Block Grant money available for participant costs.

#### **Outreach**

#### **Construction Groundbreaking**

Construction on the first leg of the AVC, to Boone and Avondale in Pueblo County, will begin in late 2022. A public groundbreaking ceremony will be planned.

# **Contracts**

#### **Three-Party AVC Contract**

A contract among Reclamation, the District and Pueblo Water was negotiated in late 2021, and will be signed in 2022. It established payments and conditions for the Arkansas Valley Conduit.

#### **AVC Repayment Contract**

The Arkansas Valley Conduit Repayment Contract between Reclamation and the District establishes payment of the District's 35% share of the AVC, and operating conditions.

# **AVC Agreements**

#### **AVC Governance Agreement**

A governance agreement for the Arkansas Valley Conduit will be needed in early 2022. The agreement will set the format for future OM&R and financial decisions that will be needed when the AVC is built.

#### **Fiscal Agent Agreement**

A fiscal agent is needed in order to accept grants for the AVC that exceed the SECWCD Enterprise limits under state law, and for smaller water companies that are not eligible for government funding. The fiscal agent might also assume other financial functions related to AVC. This needs to be in place in early 2022.

#### **AVC Participant Contracts**

Contracts for delivery and excess capacity storage (in most cases) between SECWCD and participants will be needed as participants come on-line. In 2022, this includes Avondale and Boone.

# **Technical Support**

#### **AVC Technical Meetings**

Meetings among the Enterprise, consultants and participants will continue in 2022 to discuss ways to make the AVC more efficient and prepare participants for the introduction of a new source of water into their systems. Emphasis will be on Crowley County and the La Junta area, where regionalization concepts can significantly reduce the overall costs of AVC and help participants get reliable water supply sooner.

# James W. Broderick Hydropower Plant

# **Funding**

#### Colorado Water Conservation Board (CWCB) Loan Closure

Loan closure for the \$17.2 million CWCB loan to help build the James W. Broderick Hydropower Plant is projected to be toward the end of 2022, after mechanical plugs required by the Lease of Power Privilege with Reclamation are manufactured and delivered.

# **Operations**

#### **Mechanical Plugs**

Reclamation requires mechanical plugs on site as part of the Lease of Power Privilege at Pueblo Dam. The manufacture of the plugs was delayed during the pandemic, but will be completed in 2022. The plugs are used to prevent water from entering the penstocks if other systems fail.

#### **Erosion Control**

A concrete apron will be installed on the east side driveway of the powerhouse in 2022 to reduce erosion from water running across the area and from vehicle traffic. Measures will be taken to reduce erosion on the slopes surrounding the Hydro Plant.

#### **Revegetation Approval**

Colorado Parks and Wildlife botanists will evaluate revegetation practices for the area associated with construction.

#### **Cathodic Protection**

Cathodic protection passed inspection in 2021, and will be evaluated again in 2025.

#### **SCADA Improvements**

Black Hills Energy SCADA information will be integrated with Southeastern Water Activity Enterprise record-keeping. This will reduce the reporting requirements for the Hydro Plant by automating what is now a manual process.

# **Training**

#### **Completion of Training Videos**

Enterprise staff is preparing training videos which will complement existing training materials at the Hydro Plant.

#### **Outreach**

#### James W. Broderick Hydropower Plant Tours

Water Education Colorado, the Arkansas River Basin Water Forum, federal officials, two grade-school groups and others toured the James W. Broderick Hydropower Plant in 2021. District staff will continue to be available for tours in 2022.

#### **Communication & Outreach**

# Fry-Ark 60<sup>th</sup> Anniversary

#### Fryingpan-Arkansas Project is 60 Years Old

The Fryingpan-Arkansas Project was authorized in 1962, and 2022 will mark its 60th year. The District is planning presentations, publications, displays, a tour and other activities to celebrate the milestone.

# **Arkansas Valley Conduit**

#### **Technical Outreach**

During 2021, District Board members, staff and consultants reached out to all Arkansas Valley Conduit participants, both to request American Rescue Plan Act funding and to reconnect them to the AVC project. The AVC project changed in 2019, and received major funding in 2020. During the pandemic, the face-to-face communication with policy leaders was difficult. During 2022, District staff and consultants will go back to those communities to discuss details of AVC deliveries.

#### Construction Groundbreaking

Construction on the first leg of the AVC, to Boone and Avondale in Pueblo County, will begin in late 2022. A public groundbreaking ceremony will be planned.

# **Hydropower Plant**

#### James W. Broderick Hydropower Plant Tours

Water Education Colorado, the Arkansas River Basin Water Forum, federal officials, two grade-school groups and others toured the James W. Broderick Hydropower Plant in 2021. District staff will continue to be available for tours in 2022.

# **Partnerships**

#### **Arkansas River Basin Water Forum**

The Arkansas River Basin Water Forum is being planned as a live event in Salida during April 2022. The District contributed to live and virtual activities sponsored by the Forum in 2021.

#### Arkansas Basin Roundtable

The District is active in the Public Education and Public Outreach Committee of the Arkansas Basin Roundtable. The Roundtable will have a slightly larger budget this year, and is planning to collaborate on a variety of issues in 2022.

#### Water Education Colorado (WECO) Colorado Water '22

Water Education Colorado is planning both live and virtual events for Colorado Water 2022. The District was an active participant in Water 2012, and the celebration this year dovetails with the 60th anniversary of the Fry-Ark Project. The District also contributed to WECO events in 2021.

#### Other State and National Groups

As needed, the District works with groups such as Colorado Water Congress, National Water Resources Association, Colorado River Water Users Association, Colorado Ditch and Reservoir Company Alliance and Family Farm Alliance on presentations about Fryingpan-Arkansas Project, District or Arkansas River issues. As opportunities arise in 2022, the District will participate.

#### **Media Matters**

#### News Releases

District staff issues news releases to regional media for major milestones of the District, Board members, projects and programs. These are prepared as needed.

#### **News Media Requests**

District staff fields questions from news media, and in some cases makes connections with experts to provide information to reporters or news producers on Project, District and Arkansas River issues.

Items in the 2022 Business Plan are coded according the to Strategic Plan (left) and District Fund Guide (right), depending on which areas they intersect.

District (General Fund)

Fry-Ark Project

District Operations

Enterprise (Proprietary Fund)

Water and Storage

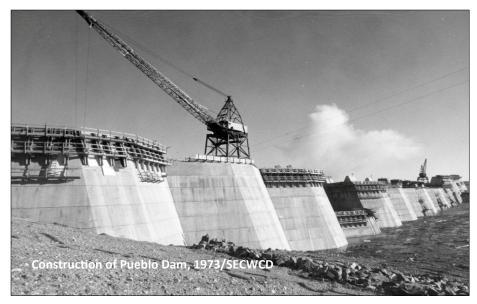

Arkansas Valley Conduit

Hydroelectric Power

# **Repayment Contract**

#### **Background & Purpose:**

The total cost to build the Fryingpan-Arkansas Project was calculated as \$585 million in 1981. The District's share of that cost was \$134.7 million, and the Repayment Contract allowed the District 50 years to repay that cost. The District paid off the municipal and industrial share first, to eliminate the 3.046 interest charge. The debt will be paid off on December 31, 2031.

#### **Amendment 11 Spread Payments Until 2031**

In 2018, Reclamation and the District signed Amendment 11 to the Repayment Contract. This allows the District to pay a fixed amount each year, making the remainder of ad valorem tax collections available for operations, maintenance and replacement (OM&R) of the Fryingpan-Arkansas Project, and for a reserve fund to pay for extraordinary maintenance, betterments or catastrophic events.

#### 2021 Activity

The District negotiated a conversion contract with Reclamation as provided for in the 1982 Repayment Contract. The new Repayment Contract sets forth conditions in perpetuity that are substantially similar to the previous Contract, including the repayment schedule.

#### 2022 Action Plan

Payments are invoiced by the Bureau of Reclamation for repayment on June 30 and December 31 each year.

Revenue for payments comes from the Project mill levy, which is assessed to portions of nine Colorado counties. This is expected to generate about \$8.8 million in 2022.

Fry-Ark Project debt is an amortized bi-annual payment which will be paid in full December 2031. Total annual expenses include the debt repayment of \$1,467,572.

#### **Strategic Plan Interface**

#### **Budget Fund**

Fry-Ark Debt Repayment	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Payments continue until 2031	\$1,467,572	\$1,467,572	\$1,467,572	\$1,467,572

# Operations, Maintenance and Replacement

#### **Background & Purpose:**

The District is responsible for a portion of all Fryingpan-Arkansas Project operations, maintenance and replacement (OM&R) by the Bureau of Reclamation. Depending on the feature of the Project, the District's share is between 47-56 percent. Cost allocations for the Project were determined in 1981. Other sources of repayment include electric power generation from the Mount Elbert Power Plant, and payments from other contracts.

#### 2022 Action Plan

Payments are invoiced by the Bureau of Reclamation for OM&R on June 30 and December 31 each year. The estimated total bill for 2022 is \$2,529,272. Fry-Ark Project OM&R credits are payments made to Reclamation on other contracts, and are expected to total \$455,269. The net payments to Reclamation total \$2,074,006.

Revenue for payments comes from the Project mill levy, which is assessed to portions of nine Colorado counties. This is expected to generate about \$8.8 million in 2022.

#### Strategic Plan Interface

**Budget Fund** 

**Fry-Ark Project** 

Fryingpan-Arkansas OM&R	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Payments to Reclamation	\$0.00	\$2,074,006	\$2,105,175	\$1,914,960

# Operations, Maintenance and Replacement Credits

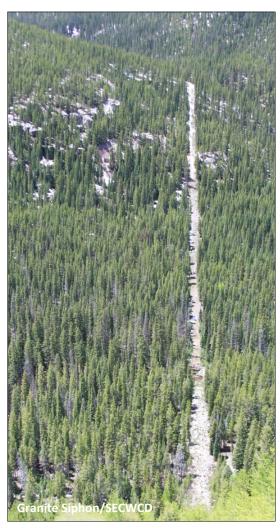

#### **Background & Purpose:**

Revenues from Bureau of Reclamation charges on certain contracts help offset OM&R costs of the Fryingpan-Arkansas Project that otherwise would be paid by the District.

#### 2022 Action Plan

Credits of \$455,269 are anticipated to offset OM&R charges of about \$2.5 million.

#### Strategic Plan Interface

**Budget Fund** 

Fry-Ark Project

Fry-Ark Project Credits	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Credited to Fry-Ark OM&R through other contracts	\$0.00	\$455,269	\$462,111	\$420,357

# Fryingpan-Arkansas Reserve Fund Balance

#### **Background & Purpose:**

A Reserve Fund for the Fryingpan -Arkansas Project was established in the 11th Amendment to the Fry-Ark Contract in 2018, and confirmed in the 2022 Repayment Contract conversion. The Reserve Fund can be used for extraordinary expenses of the Fry-Ark Project with the consent of the District and Reclamation.

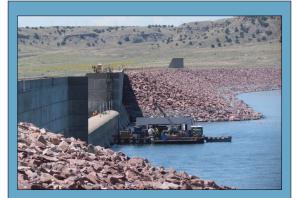

#### 2021 Activity

The Fryingpan-Arkansas Reserve Fund balance at December 31, 2021, was \$14.9 million.

#### 2022 Action Plan

The District continued discussions with Reclamation's Eastern Colorado Area Office for use of Reserve Funds, and potentially Infrastructure Funds for the next steps of the Recovery of Storage and Asset Valuation studies.

# Fry-Ark Reserve Fund Balance Potential Activities

- √ Joint seal repair at Pueblo Dam
- √ Interconnect at Pueblo Dam
- $\sqrt{}$  Recovery of Storage Activities
- √ Twin Lakes extraordinary maintenance
- $\sqrt{\phantom{a}}$  Turquoise Lake extraordinary maintenance
- √ West Slope Collection System extraordinary maintenance and betterments.

#### Strategic Plan Interface

**Budget Fund** 

Fry-Ark Reserve Fund Balance	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Reserves (Estimated 2022-2024)	\$14.9 million	\$20.2 million	\$25.7 million	\$31.5 million

# Fry-Ark Project Miscellaneous Revenues

#### **Background & Purpose:**

Since 1986, excess capacity contracts in Pueblo Reservoir have been issued by Reclamation, when there is insufficient Fry-Ark Project water to fill the reservoir. Under PL 111-11, those revenues can be applied to unfinished parts of the Fry-Ark Project. Since 2009, the South Outlet Works, Ruedi Reservoir, and Fountain Valley Conduit received miscellaneous revenues. Miscellaneous revenues now go toward construction and repayment of the Arkansas Valley Conduit.

#### 2021 Activity

Miscellaneous revenues were applied to the Fountain Valley Conduit for the final time in 2021. The FVC which was completed in 1985, and miscellaneous revenues reduced the 40-year payment period.

**2022 Action Plan**The Fountain Valley

2022.

funded.

Conduit will make its final payment to Reclamation for construction of the Fountain Valley Conduit in

# **Excess Capacity Master Contract**

#### **Background & Purpose:**

A 40-year Excess Capacity Master Contract between the District and Bureau was signed in 2016. It allows 37 entities within the District to store water in Pueblo Reservoir if and when space is available. So far, 16 participants have elected to sign contracts, and 21 more are expected to sign on as the Arkansas Valley Conduit is completed. Maximum storage is 29,938 acre-feet, with 6,595 under contract in 2022.

#### 2022 BUSINESS PLAN/FRYINGPAN-ARKANSAS PROJECT

# **Winter Water**

#### **Background & Purpose:**

The Winter Water storage program allows native water to be stored from November 15-March 15 each year. The water is divided according to the priority in which it otherwise would have been used. Water can be stored in Pueblo Reservoir, John Martin Reservoir or in reservoirs owned by the canal companies. The District collects payments for Pueblo Reservoir storage, which are forwarded to Reclamation and applied to the Arkansas Valley Conduit under the Contract.

#### 2021 Activity

A total of 83,667 acre-feet of water were stored in the 2020-21 Winter Water Program, with 30,517 stored in Pueblo Reservoir. This was about 65 percent of average. Payments to Reclamation totaled \$85,449, or \$2.80 for each acre-foot in Pueblo Reservoir. In October, the District hosted the annual meeting of the Winter Water Board for Trustees at Otero Junior College in La Junta.

#### 2022 Action Plan

Winter Water is projected to provide 42,000 acre-feet in Pueblo Reservoir, based on the 20-year average.

Early indications (November 30 report) show that the 2021-22 Winter Water Program was storing the same amount as the previous year, about 75 percent of average.

The District will host the annual meeting in La Junta during October.

#### WINTER WATER PROGRAM

#### **Participants:**

- •The Southeastern Colorado Water Conservancy District
- Amity Mutual Irrigation Company
- Bessemer Irrigating Ditch Company
- Catlin Canal Company
- •The Colorado Canal Company
- The Fort Lyon Canal Company
- •The High Line Canal Company
- The Holbrook Mutual Irrigating Company
- •Lake Henry Reservoir Company
- •Lake Meredith Reservoir Company
- •Las Animas Consolidated Canal Company

Payments to Reclamation, based on 20-year average	\$85,449	\$117,600	\$117,600	\$117,600

#### 2022 BUSINESS PLAN/FRYINGPAN-ARKANSAS PROJECT

# **Reclamation Reform Act**

#### **Background & Purpose:**

The Reclamation Reform Act (RRA) was signed in 1982 to encourage family farming and limit speculation on irrigated farmland. Irrigation water users under federal projects are required to certify their landholdings by filing RRA forms prior to receiving Fry-Ark Project water. RRA compliance is a condition of the Fry-Ark Repayment Contract with Reclamation.

#### 2021 Activity

District staff met consulted 340 of the 3,220 ditch shareholders in the Arkansas Valley to certify the amount of acres being farmed. Landowners with more than 240 acres are required to report. These reports are confidential and protected.

Reclamation makes the determination of eligibility. RRA restricts Fry-Ark Project water to farm units under 960 acres for qualified recipients, and under 640 acres for limited recipients.

#### **Strategic Plan Interface**

#### **Budget Fund**

Fry-Ark Project

#### 2022 Action Plan

An audit of the RRA program occurs every five years, which was schedule for 2020 but was delayed during the COVID pandemic. This audit has since been reschedule to be completed in 2022. Staff will continue to meet with landowners to assure compliance and collect completed forms. The budget includes \$20,000 for possible fee bills as a result of the audit.

Reclamation Reform Act	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Subject	0	\$20,000	0	0

# **Human Resources**

#### **Background & Purpose:**

The District has developed a workforce that is well-trained in the skills needed to complete the tasks necessary to achieve the District's goals. Staff has grown from just three people in the 1960s to 11 at the beginning of 2022. As the District's projects, programs and operations increase in complexity, more workers are needed to carry out the work of the District.

Toni Gonzales, center, is surrounded by family members at her retirement party in October 2021. She worked at the District for 45 years.

#### 2021 Activity

Following the retirement of Toni Gonzales after 45 years with the Southeastern District, staff adjusted to new duties in 2021 in the administration of the District, maintenance of headquarters and day-to-day operations.

The District celebrated Toni's service with a retirement party at the Pueblo Zoo in October, which was attended by her many friends, family members, coworkers and Board members.

Staff also adjusted to the return to headquarters in June 2021, following more than a year of working mostly from home. In open space offices walls, doors and single use ventilation were added to ensure employee safety. Work station technology upgrades were made to improve remote meetings access due to the COVID pandemic.

#### 2022 Action Plan

In 2022, new employees will be added to deal with increased workload in areas such as the Arkansas Valley Conduit, to assure proper skill sets are in place both now and in the future, and to foster succession planning. More hires, or consultants, may be added to help with the Enterprise portion of the Arkansas Valley Conduit.

At the beginning of 2022, a staff attorney to assist General Counsel in a number of upcoming important projects, and in March, a Project Manager was hired.

A Water Resources Specialist/Engineer and Part-Time Gardener will be hired.

Also in 2022, an in-house salary survey will be conducted by staff to ensure the District ensures competitive wages.

#### **Strategic Plan Interface**

#### **Budget Fund**

Human Resources	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Expenditures	\$1,720,098	\$2,187,631	\$2,275,137	\$2,366,142

# District Headquarters Operation & Capital

#### **Background & Purpose:**

Headquarters is the central meeting place for the District's Board and committees, as well as the work-place for its employees. The District returned to full staff in the office in the latter half of 2021, although some employees chose to work remotely for some of the time. The grounds of the headquarters (see next page) and meeting rooms also fulfill community gathering functions.

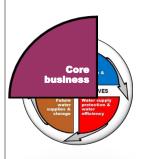

#### 2021 Activity

Replacement of air-conditioning and heating equipment was the major improvement to District Headquarters, as staff and Board became reacquainted with the building when pandemic restrictions eased.

#### **Strategic Plan Interface**

#### **Budget Fund**

**District Operations** 

#### 2022 Action Plan

In 2022, District staff will evaluate the changes that have occurred and the work that still needs to be done to return to full functionality. A capital improvement plan provides guidance about the likelihood of replacement or betterment of the facilities now in place.

More replacement of HVAC equipment is planned. Additionally, a demonstration project is planned at the northeast corner of the building that will have the dual purpose of building a retaining wall to stabilize the building's foundation.

Specific areas within the Headquarters Operation & Capital Plan are discussed in Pages 16-19 of this Business Plan.

Headquarters Operation	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Includes Building, Grounds, Vehicle Maintenance, IT	\$391,673	\$526,540	\$484,227	\$549,472

# **District Grounds**

#### **Background & Purpose:**

The gardens of the District serve as an educational tool for conservation programs. Water-wise gardening techniques are practiced and explained through interpretive signs. The long-term goal of the demonstration garden is to provoke ideas that encourage water conservation while maintaining superior outdoor living conditions.

#### 2021 Activity

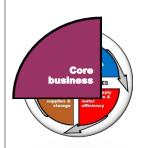

We moved back into newly remodeled offices in June 2021, as pandemic restrictions eased. Employees who had been working at the office noticed that an asparagus-like stalk from an agave plant was growing by several inches each day. News of the "century plant" spread by word of mouth, and some visitors would check in daily to see the progress. When it began to bloom, the plant was more than 14 feet high, and truly an inspiring sight for District staff and visitors alike!

#### 2022 Action Plan

The retirement of the District's gardener at the end of 2020 showed the need for a part-time, dedicated employee to maintain the three acres of plant and animal life. A lawn service was able to perform basic maintenance in 2021, and Pueblo's Master Gardeners provided some assistance. In 2022, the District will evaluate a path forward to maintain the educational value of the demonstration garden.

#### **Strategic Plan Interface**

**Budget Fund** 

# **Information Technology**

#### **Background & Purpose:**

Information technology is critical to all facets of District and Enterprise operations. The District contracts for information technology services, and uses this outside expertise to adapt to rapid changes in hardware, software and Internet capability to develop the optimal environment for conducting business.

#### 2021 Activity

In mid-2021, the District returned to working in the office, and restructuring meetings from virtual format to a hybrid of virtual and in-person. In 2020, the District added OnBoard software as the best option to incorporate the in-person and virtual experiences.

The District bought additional notepad computers so Board members would have the option to review documents associated with the District either at Headquarters or on-line. Cameras and improved sound capability were added to work stations at the District.

Technology also connects the District with stakeholders and outside organizations. In 2021, there were both online and in-person meetings, conventions and water tours.

New work stations were added in several offices to meet changing needs and to replace some older equipment that was becoming obsolete.

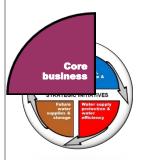

#### 2022 Action Plan

In 2022, the District plans to continue improving the work and meeting environment.

One of the difficulties encountered in 2021 was the quality of sound in the Board room for those attending on-line meetings. District staff is looking at improvements that will correct this problem as hybrid meetings continue.

At the same time, the District will continue improvements to upgrade work stations and the inperson meeting environment.

#### **Strategic Plan Interface**

#### **Budget Fund**

# **Records Management**

#### **Background & Purpose:**

There is a treasure trove of information about southern Colorado water available at District Headquarters. Moving the information into a digital format will save countless hours of research time when information is needed. The District is investigating the best method to transfer records to a digital format.

#### 2021 Activity

Records management continued in the traditional manner with both physical and electronic versions of important documents filed for relatively easy retrieval and reference.

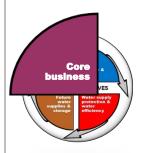

The District continued discussions about the best way to convert records to a more accessible format.

The District intends to investigate options to begin full digitalization of important records, and has budgeted \$50,000 for 2022.

**Strategic Plan Interface** 

**Budget Fund** 

# Fleet Management

#### **Background & Purpose:**

The District owns three vehicles, which are generally replaced on a six-year cycle. One vehicle is used by the Executive Director for frequent trips throughout the state of Colorado, and out of state if necessary. The others are used by staff on District business trips.

#### 2021 Activity

The District was scheduled to buy a new vehicle in 2021 to replace the 2014 Toyota Rav 4. Because there were fewer travel needs in both 2020 and 2021, there was low mileage on the vehicle, so the purchase was deferred.

The District plans to purchase a new vehicle in 2022.

#### Strategic Plan Interface

**Budget Fund** 

# **Boundaries and Inclusion**

#### **Background & Purpose:**

A project as part of the Legal Engineering program began in 2019 to determine District boundaries. This is important in order to maintain revenues that support the Fryingpan-Arkansas Project.

An Inclusion Manual was approved by the District Board in 2018. It includes policies for inclusion into the District by annexation, petition and election.

#### 2021 Activity

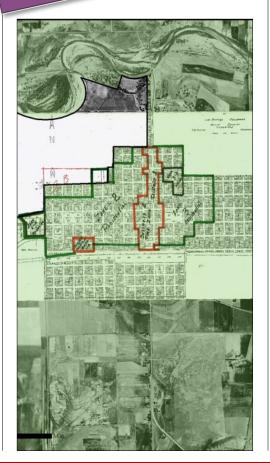

An effort to precisely define District lines continued in 2021 with the assistance of Wilson Water Group. District boundaries, as described in the 1958 degree and subsequent inclusions, occasionally differ from modern GIS files. The boundaries are being "trued up" to avoid discrepancies.

The goal is to develop a comprehensive District boundary that can be readily distributed, displayed on the District website, easily maintained and updated annually, and trace changes in boundaries to corresponding inclusion documents.

#### 2022 Action Plan

The District has spent several years working with Colorado Springs to define boundaries. More work is needed, however, particularly in the remainder of El Paso County, Pueblo County, and Fremont County.

**Budget Fund** 

Boundaries and Inclusion	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Included in Legal Engineering Budget	\$4,961	\$15,000	\$15,000	\$15,000

# **Water Rights Protection**

#### **Background & Purpose:**

Water rights in Colorado are defined in the state Constitution, and administered under what is called the "Colorado Doctrine," or first in time, first in right. Water put to beneficial use is prioritized according to when the first use was claimed. The District has water rights in Divisions 2 and 5, and has adopted standard language for water court cases that have an impact on Fry-Ark Project water.

#### 2021 Activity

Upper Arkansas water rights diligence was filed.

The District filed statements of opposition or reached stipulations in eight Division 2 and two Division 5 cases, as reported at monthly meetings of the District Board.

The District legal team also monitored state legislation for possible threats to Fry-Ark Project water rights.

Colorado River developments were tracked and explained to the Board.

#### 2022 Action Plan

The District files for diligence of conditional water rights every six years. The next filings will be in 2022 in Division 2 and 2024 in Division 5.

The District will continue to monitor water court filings in 2022, intervene in cases when necessary, monitor state legislation and track Colorado River developments.

# Fryingpan-Arkansas Project Key Water Rights

#### Division 2

Storage Rights: Turquoise Lake, Twin Lakes Reservoir, Mount Elbert Forebay, Pueblo Reservoir, 575,036 acre-feet absolute.

Other Structures: Mount Elbert Conduit, Halfmoon Diversion, 520 cfs.

Conditional Diversions: Six, 350-725 cfs.

Exchange Rights: Project water into Pueblo Reservoir, Twin Lakes Reservoir, and Turquoise Reservoir. Arkansas River exchanges.

Priority Date: February 10, 1939

#### Division 5

Fryingpan-Arkansas Divide Tunnel (aka Boustead Tunnel, including all tunnels from North Side and South Side Collection Systems: 900 cfs unless Ruedi will fill, then 945 cfs.

(Stipulation generally precludes enlargement claims)

Priority Date: July 29, 1957

#### **Strategic Plan Interface**

**Budget Fund** 

Water Rights Protection	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Legal Representation Expenditures	\$72,108	\$235,000	\$235,000	\$235,000

# **Outside & Professional Services**

#### **Background & Purpose:**

The District relies on outside consultants to perform much of the legal, technical, financial, and other professional services needed to meet the goals and objectives of the District on a routine basis. These are long-term relationships with specialized firms that bring years of expertise from diverse areas to the District. These services are used in all aspects of the District and Enterprise budgets.

#### 2021 Activity

Fees for outside and professional services were up in 2020 and 2021, largely because of additional help need to form a plan to build the Arkansas Valley Conduit (AVC) when federal funding for the AVC project increased. A subfund was created within the Enterprise Fund for the AVC to account for the increased activity.

Additionally, the District converted its Fryingpan-Arkansas Project contract with Reclamation in 2021, requiring more of our water policy management consultant's time and travel expenses.

More routine expenses include federal lobbying expenses, the annual audit, Colorado River services, legal services, and engineering services.

#### 2022 Action Plan

The need for outside and professional services will remain high in 2022, as the District continues to develop the structure for governance for the AVC, and as construction begins on the AVC. The District is seeking to use federal infrastructure funding to accelerate the schedule for building AVC, and that means District activity also will be accelerated.

#### **Strategic Plan Interface**

#### **Budget Funds**

Fry-Ark Project

**District Operations** 

Water & Storage

AVC

Hydropower

Outside & Professional Services	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Expenditures (combined all funds)	\$604,936	\$989,210	\$1,010,578	\$1,043,203

# **Water Conservation and Education**

#### **Background & Purpose:**

Water conservation is at the core of every activity undertaken by the District and Enterprise. The fair and equitable distribution of water among stakeholders within in the District requires wise use of water with minimum waste. In turn, supplemental Fry-Ark water provides a valuable resource in terms of municipal and domestic supply, and increased value in irrigation. Public understanding of these principles is crucial for the success of the Fry-Ark Project.

#### 2021 Activity

During the pandemic, the District continued its support of water conservation and education programs both live and online.

The District assisted Family Farm Alliance (FFA) and the National Water Resources Association (NWRA) in an appeal for water infrastructure funding. The District provided a virtual presentation of the Arkansas Valley Conduit for the annual conference of Colorado Water Congress (CWC).

The District contributed \$19,750 to the Aquatic Nuisance Species (ANS) program, along with Colorado Springs Utilities and Pueblo Water. The funds assure that boats are inspected at Lake Pueblo State Park during winter months, when it is not economical for Colorado Parks and Wildlife to staff the lower number of boats using Pueblo Reservoir.

The District was the primary sponsor of a Water Education Colorado (WECO) virtual tour of the Lower Arkansas Valley, and assisted in producing much of the content for the event.

The District also assisted the Arkansas River Basin Water Users Forum in developing online materials in the absence of a live event because of pandemic restrictions. The District also hosted a Forum tour of the James W. Broderick Hydropower Plant.

Two elementary schools toured the Broderick Power Plant as well.

The District also was a participant in Arkansas Basin Roundtable public outreach planning.

#### 2022 Action Plan

The District will contribute \$20,000 to the ANS program in 2022, to continue vigilance against the threat of zebra and quagga mussels or other invasive species in Pueblo Reservoir.

The District also will continue its association with WECO, the Arkansas River Basin Water Forum, the Arkansas Basin Roundtable, CWC, FFA, NWRA, and other groups.

#### Strategic Plan Interface

**Budget Fund** 

Water Conservation & Education	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Expenses	\$11,983	\$78,734	\$51,763	\$53,034

# Communications/Outreach

#### **Background & Purpose:**

Communications and Outreach support District and Enterprise activities through both education and advocacy. These activities complement programs and projects by providing clear explanation to stakeholders, decision makers, regulators and the general public. This interface promotes understanding of the policy direction of the District and Enterprise, as well as aiding in planning for the future. These activities are closely related to Conservation & Education.

#### 2021 Activity

During the COVID-19 pandemic, it was difficult to meet with stakeholders, particularly in the Arkansas Valley Conduit (AVC) project. Staff and Board members traveled to meet with each of the 39 participants during the summer and fall of 2021. There were also meetings with county commissioners to encourage financial assistance for the AVC, particularly for private water companies that have limited access to governmental sources of funding.

In addition, the District hosted meetings on changes in the allocation policy that are being considered following the conclusion of the Agricultural First Right of Refusal Pilot Program.

There were also several tours of the James W. Broderick Hydropower Plant designed to increase public understanding of the District's role in helping to develop renewable energy (see Conservation & Education section).

#### 2022 Action Plan

Three major programs are planned for 2022.

The District will update its 2017 Conservation Plan, which is a requirement of the Repayment Contract with Reclamation. The Conservation Plan also looks back on how Fryingpan-Arkansas Project water has been used since the beginning of the Fry-Ark Project.

The District and Reclamation will mark the 60th anniversary of the Fry-Ark Project. In the planning phase are a tour, interpretive displays, publications, and related activities.

Finally, AVC construction is expected to begin in late 2022. Special observances will be forth-coming.

#### **Strategic Plan Interface**

#### **Budget Funds**

**District Operations** 

Water & Storage

Communications & Outreach	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Costs included with other budget funds	\$4,284	\$35,000	\$7,080	\$7,363

#### 2022 BUSINESS PLAN/DISTRICT OPERATIONS/PLANNING & DEVELOPMENT

# **Financial Study**

#### **Background & Purpose:**

A financial study in 2019 paved the way for a new way of looking at District and Enterprise finances. Matching revenues to expenditures is critical to building a foundation for a more stable financial future. The forward-looking Financial Plan provides a more strategic way of looking at the funding needs for years to come.

#### 2021 Activity

Surcharges remain at the levels they were prior to the 2019 rate study. It was decided to defer further discussions to the next financial study.

The cost of water was increased in 2020, and remained the same in 2021 and 2022.

The Board also has deferred decisions on the appropriate charge for Project water carryover storage, Winter Water charges, and reserve fund targets and funding sources. These are expected to be part of a future financial study.

#### 2022 Action Plan

In 2022, District staff will evaluate financial planning, including running the rate model developed in the previous financial study.

# Budget Funds Fry-Ark Project District Operations Water & Storage AVC Hydropower Back to Contents Electronic Version

#### 2022 BUSINESS PLAN/DISTRICT OPERATIONS/PLANNING & DEVELOPMENT

# **Reserve Funds**

#### **Background & Purpose:**

A new approach to fund reserves was recommended in the 2019 Financial Study to create broad categories of reserves that would allow the District and Enterprise to meet extraordinary costs in the future — including costs that are known and those that are unexpected. Sources and target levels of Reserve Funds have yet to be determined.

Strategic Plan Interface

Reserve Category	Purpose	Target Funding Level
Cash Reserve	Working cash sufficient to fund cash-flow variations in a typical operating cycle.	(To be determined)
Operating Reserve	Covers potential interruptions in District Operations and District Enterprise Fund revenue streams; and may be used to smooth and stabilize water rates over the	(To be determined)
Capital Reserve	Funds capital repair, replacement, or betterment of SECWCD properties; funds other capital activities that may be undertaken by SECWCD.	(To be determined)
Exposure Reserve	Covers extraordinary, unforeseen events not otherwise covered by reserves or	(To be determined)

#### 2021 Activity

Discussions on how to structure Reserve Funds were delayed.

#### 2022 Action Plan

Discussion on sources and levels of reserve funds will continue.

#### 2022 BUSINESS PLAN/DISTRICT OPERATIONS/PLANNING & DEVELOPMENT

# **Asset Valuation & Condition Assessment**

#### **Background & Purpose:**

The District began an asset valuation study in 2020 that looked at Fryingpan Arkansas features, District assets and Enterprise assets. The next phase of this study will be a condition assessment to determine future funding needs and priorities.

#### 2021 Activity

Features and assets were identified and scored according to industry standards by Providence Infrastructure Consultants under a contract with the District.

All of the features of the Fry-Ark Project were studied individually, using Reclamation comprehensive, periodic, annual and special reviews. The Power Work Plan and Southeastern District budget documents also were used.

The District asset evaluated was the headquarters building, which was constructed in 2000.

The James W. Broderick Hydropower Plant was the sole enterprise asset evaluated.

#### 2022 Action Plan

The Conclusions and Next Steps of the Providence study identified three areas for future study:

- Use the feature scoring results from Phase 1 to prioritize condition assessment work to begin in 2022. The condition assessment involves on-the-ground studies as well as continued document reviews.
- 2) Develop and refine condition assessment tools and checklists to be used during the performance of physical condition assessment work.
- 3) Refine the preliminary Capital Improvement Plan (CIP). As the condition assessment work is completed, more accurate projections can be plugged into the CIP.

#### **Strategic Plan Interface**

#### **Budget Fund**

Asset Valuation/Condition Assessment	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Expenditures	\$86,639	\$250,000	\$250,000	\$250,000

#### 2022 BUSINESS PLAN/DISTRICT OPERATIONS/PLANNING & DEVELOPMENT

# **Recovery of Storage**

#### **Background & Purpose:**

Pueblo Reservoir has lost about 25,000 acre-feet of space due to sedimentation since the Pueblo Dam was completed in 1975. In 2020, the District launched a study to find remedies to restore the full amount of space intended to serve the Fryingpan-Arkansas Project. The first year of the study provided a better estimated of the rate of loss for storage space.

#### 2021 Activity

The Recovery of Storage study by Mott MacDonald was continued with the following directives:

- 1) To determine when loss of storage will become critical to the Fryingpan-Arkansas Project.
- 2) To determine upstream sources of sediment loading into Pueblo Reservoir.

Mott MacDonald completed the work in September 2021, and made recommendations for the next phase of study.

The Resource and Engineering Planning Committee directed staff to analyze when loss of storage will become critical to both Fry-Ark Project and Excess Capacity accounts.

#### 2022 Action Plan

In 2022, the Recovery of Storage studies will continue, with additional participation sought from the Bureau of Reclamation.

One of the recommendations is to perform a new bathometric survey and related measurements to more accurately track the rate of sedimentation. At the same time, more information is needed to pinpoint the most prevalent sources of sedimentation.

Staff also has researched the apparent rate of sedimentation and determined that Excess Capacity contracts could be impacted as soon as 2046, while Fry-Ark Project accounts likely will be affected by sedimentation toward the end of the century.

**Strategic Plan Interface** 

**Budget Fund** 

Recovery of Storage	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Expenditures	\$90,100	\$300,000	\$300,000	\$300,000

# **Streamflow Forecasting**

#### **Background & Purpose:**

The Enterprise budget is based on 20-year averages for water sales and storage. The annual allocation is based on Reclamation's May 1 forecasts for imports from the Fryingpan River based to the Arkansas River basin. Since 2012, imports have been significantly higher or lower than the May 1 forecast, pointing to the need for reliable tools to forecast Fry-Ark Project yield.

#### 2021 Activity

The May 1 forecast indicated that it would be a dry year. Reclamation estimated that only about 38,000 acre-feet would be imported, or about 70 percent of normal. Actual imports were 30,800 acre-feet, or 81 percent projected imports.

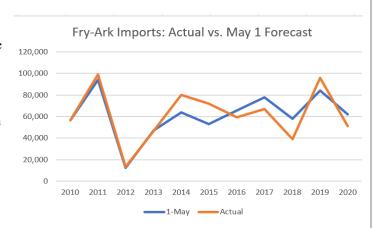

The District's initial strategy was to pay for more Natural Resource Conservation Service Snotel sites at higher elevations that would better encompass the range of snowpack and improve predictions.

However, further research shows that more factors are involved, including soil moisture conditions, late spring weather conditions, and changing precipitation patterns

#### 2022 Action Plan

Staff will look at other available technologies that could improve water availability forecasting.

This also is a program that will require working with Reclamation to incorporate more data sources into forecast methodology. Staff will employ the best available methods in the 2022 forecast.

#### Strategic Plan Interface

#### **Budget Fund**

Streamflow Forecasting	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Expenditures	_	\$10,000	\$10,000	\$10,000

# **CoAgMet Monitoring**

#### **Background & Purpose:**

CoAgMet, a program of Colorado
State University, operates weather stations throughout the state of Colorado.
The information is particularly valuable for irrigated agriculture, and helps contribute to water conservation. There are 17 sites that collect weather data in the Arkansas River basin, and 13 of those are aligned with the mainstem of the River. The District cooperates with other entities that fund the CoAgMet program.

#### 2021 Activity

# Watershed Health

#### **Background & Purpose:**

With the increase in number and severity of wildland fires, water providers across the West face new issues associated with watershed health. A fire in the forested areas that surround the highmountain reservoirs of the Fryingpan-Arkansas Project could be devastating. Even lower elevation fires near Pueblo Reservoir pose a risk.

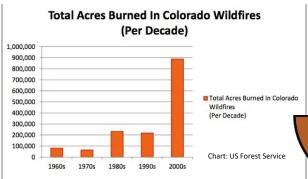

#### 2021 Activity

The Southeastern District historically continued to rely on its partnership in the Fry-Ark Project with the Bureau of Reclamation to pay for costs associated with Watershed Health.

#### 2022 Action Plan

The District has budgeted money for potentially joining the Arkansas River Watershed Collaborative through the Arkansas Basin Roundtable for projects that have a direct relationship to Fry-Ark Project facilities. This would be a cost-share agreement with other water interests. No agreement is currently in place.

#### Strategic Plan Interface

**Budget Fund**

# Water Quality Monitoring

#### **Background & Purpose:**

The Enterprise is a cooperating agency with the U.S. Geological Survey in the maintenance of stream gauges at key points in the Arkansas River basin. The Enterprise pays about 70 percent of the total costs, while Special Projects (Master Contract, AVC and Enlargement) participants pay about 80 percent of the Enterprise costs.

#### 2021 Activity

The U.S. Geological Survey (USGS) monitors long-term water quality, collects continuous specific-conductance data, measures baseline changes, collects streamflow data, measures suspended sediment, and tracks reservoir quality at mainstem Arkansas River sites, major tributaries, and Pueblo Reservoir. The Enterprise has two Joint Funding Agreements with the USGS that support 10 monitoring stations on the mainstem and four stations on tributaries. The USGS posts information online and presents monthly reports to the District Board.

#### 2022 Action Plan

No major changes are planned in the water quality monitoring program in 2022.

# Colorado River Programs

#### **Background & Purpose:**

Programs in the Colorado River basin support Fryingpan-Arkansas Project water rights owned by the District. These programs are operated through partnerships with the Bureau of Reclamation, Colorado Water Conservation Board, Front Range Water Council, Colorado River Water Users Association and Colorado Water Congress.

#### 2021 Activity

The District supported ongoing efforts to provide water to endangered fish species in the Colorado River.

Providing additional water for release — the "10825

Program" benefits four species: Humpback Chub, Razorback Sucker, Bonytail and Colorado Pikeminnow. In 2021, the U.S. Fish and Wildlife down listed the Humpback Chub to threatened, rather than endangered.

The District also supported a weather modification program that increases chances of snowfall in areas that benefit both the West Slope and water supply for the Front Range.

The District also participated in interstate discussions on how to deal with lingering drought in the Colorado River basin.

#### 2022 Action Plan

Support for Colorado River programs will continue in 2022.

Each year, Arkansas River water users benefit from an average 130,000 acre-feet of water imported from the Colorado River, including 57,000 by the Fry-Ark Project.

Making sure this supply continues is a high priority for the Southeastern District and its stakeholders.

#### **Strategic Plan Interface**

# **Fountain Creek Transit Loss Model**

#### **Background & Purpose:**

The rate of flow, bank seepage, evapotranspiration rates, contributed flow from tributaries, and diversions are taken into account for the Fountain Creek Transit Loss Model. The District pays a charge for municipal return flows tracked during the previous year under the model. In years with no return flows, there is only a membership base fee.

#### **Historic Action**

The Fountain Creek Transit Loss Model was developed in 2007 by the U.S. Geological Survey to track flows along 78 miles of waterways. The Southeastern District joined in order to better measure municipal Return Flows.

The model breaks 78 miles of river into 33 reaches, and calculates the amount of losses at varying flows. It is necessary to measure the losses in order to assure water rights are not injured by the many diversions along Fountain Creek and Monument Creek.

The District is one of 17 participants in the program, and pays an annual membership, plus an additional fee based on its share of Return Flows that are not claimed during the year.

The additional fee is assessed in the year following the measurement.

# Regional Resource Planning Group

#### **Background & Purpose:**

More than a decade of studies guided by the Regional Resource Planning Group have produced clearer understanding of water quality issues in the Arkansas River basin. The group is now considering a future course of action that will guide future studies.

#### 2021 Activity

The Regional Resource Planning Group met in late 2021 and agreed to proceed with a U.S. Geological Survey agreement to establish a water quality baseline for reaches of the Arkansas River. The 2021 meeting was the first since 2018, as the group evaluated its future course of action.

#### 2022 Action Plan

The group will meet later in 2022 with the USGS to review progress on developing the baseline. At that time, future courses of action will be reviewed.

#### **Historic Activity**

The Regional Resource Planning Group (RRPG) was created with the signing of the October 3, 2003 Intergovernmental Agreement (IGA) between the Southeastern Colorado Water Conservancy District and Aurora.

Meetings began on May 21, 2004, and the group spent six years settling immediate issues and developing a long-term scope of work.

Though cooperative funding agreements with the USGS, six additional water quality studies were completed. A total of \$1.9 million was spent on studies, with RRPG members contributing 58 percent of the costs.

Studies ranged from underground storage in the Upper Arkansas River basin to Fountain Creek water quality to selenium sources in the Lower Arkansas River basin.

#### RRPG members are:

- Aurora
- Pueblo Water
- Colorado Springs Utilities
- Lower Arkansas Valley Water Conservancy District
- Upper Arkansas Water Conservancy District
- Southeastern Colorado Water Conservancy District

# **Safety of Dams**

#### **Background & Purpose:**

The Enterprise collects a surcharge to repay Reclamation for a portion of the Safety of Dams work done in 1998 -99. The work included a series of rock bolts and a 22-foot concrete cap. The cost was \$17.6 million, and the District's share was \$2.4 million (13.63%). The District paid the municipal cost (5.42%) first to avoid interest. The irrigation cost (8.21%) was spread at \$60,000 per year over 25

#### **Historic Activity**

After Reclamation completed its work to bolster Pueblo Dam, the Enterprise began payment for the Safety of Dams (SOD) surcharge in 2000. The obligation will be paid off in 2024.

The District Board opted to pay the M&I portion of costs in a lump sum to avoid interest payments, while the Irrigation payments are \$60,000 per year.

In a 1998 Board Resolution, there was a one-time transfer of reserves from the District to the Enterprise for "activities and obligations of the Activity Enterprise" in the amount of \$2,800,000. The District made the transfer in anticipation of SOD repayments, which was the major activity at the time. However, there is no mention of repayment of the money.

In 1999, the Board transferred \$1,000,000 in District reserves to the Enterprise to pay for the M&I portion of the SOD repairs as they were incurred to avoid the interest portion of repayment. Thus, a total of \$3.8 million was transferred from the District to the Enterprise for SOD.

For the actual work completed, Irrigation payments totaled \$1,450,819, and have no interest component.

Over a 25-year period this totals \$58,032 annually and is covered by annual payments of \$60,000 to Reclamation. The final payment in 2024 will be less than \$60,000.

#### **Strategic Plan Interface**

#### 2022 BUSINESS PLAN/ENTERPRISE/PLANNING & DEVELOPMENT

# **Upper Arkansas River Basin Storage**

#### **Background & Purpose:**

Future storage in the Upper Arkansas River basin will allow the District to better time delivery of imported water, provide more efficient delivery to entities west of Pueblo, and to release water for the Upper Arkansas Voluntary Flow Management Program.

#### **Historic Activity**

Innovative projects by the Upper Arkansas Water Conservancy District propose to add integrated surface and underground storage in the Upper Arkansas River.

Two projects also will explore new concepts for an interruptible water supply for cities in order to avoid "buy and dry" of irrigated farmland; enhance recreational and environmental opportunities; provide low-impact hydroelectric power generation; educate the pub-

lic; and encourage publicprivate collaboration.

The two projects share many of the same components, but different in scale. Currently, the Upper Ark District is doing a feasibility study at Lake Ranch. The Trout Creek Multi-Use Project, for which the Upper Ark District is seeking funds

in the form of partnerships, is a larger, more complex version of the Lake Ranch Multi-Use Project.

The project is located just west of Trout Creek Pass near Buena Vista, in an area that presently contains wetlands, wildlife habitat, and irrigated agriculture. The goal is to keep all of those values in a sustainable project.

Crucial to that is the need for storage. Surface storage, underground storage, and aquifer recharge ponds will all work in concert to fulfill the goal.

The Upper Arkansas District is actively pursuing the Trout Creek project and Southeastern has some upper basin storage goals that would fit in with the project.

#### Strategic Plan Interface

Upper Arkansas Storage	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Expenditures for cooperative program	_	\$25,000	\$25,000	\$25,000

#### 2022 BUSINESS PLAN/ENTERPRISE/CAPITAL OUTLAY

# **Restoration of Yield**

#### **Background & Purpose:**

Restoration of Yield (ROY) is part of the 2004 agreement to maintain recreational water levels in the Arkansas River through Pueblo. It allows participants to capture foregone exchanges through Pueblo downstream for later exchange. Since 2004, downstream space has been leased. The partners in the project have been investigating various sites for storage as well.

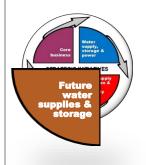

#### 2021 Activity

The participants in the ROY project (see box at right) signed an intergovernmental agreement to purchase a reservoir site just east of Boone (see map below). The site was chosen following a comprehensive screening of potential sites that began in 2014. Flows would be diverted via the Colorado Canal into a 4,300 acre-foot reservoir. The total cost to acquire the property was \$2.85 million, of which the Enterprise's share is \$142,500.

ROY Participants	
Pueblo Water	28.58%
Colorado Springs	28.57%
Aurora	28.57%
SECWCD	4.76%
Fountain	4.76%
Pueblo West	4.76%

#### **Strategic Plan Interface**

#### **Budget Fund**

Water & Storage

#### 2022 Action Plan

The construction of the Haynes Creek reservoir likely will not occur for at least 10 years, and the Enterprise's share would be about \$2 million.

Under the Capital Improvement Plan, it is recommended that \$200,000 be set aside annually to pay for the Enterprise portion of the reservoir construction.

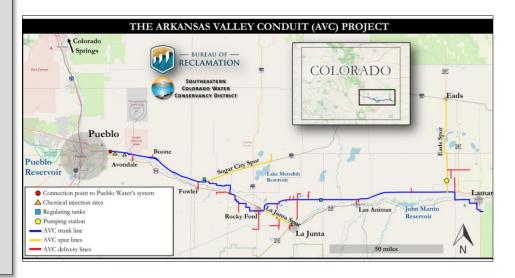

Operations, Program, Project or Plan	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Development of ROY storage	\$135,373	\$200,000	\$200,000	\$200,000

#### 2022 BUSINESS PLAN/ENTERPRISE/ARKANSAS VALLEY CONDUIT

# **Arkansas Valley Conduit Construction Plan**

#### **Background & Purpose:**

The Arkansas Valley Conduit (AVC) is a 130-mile long pipeline that will bring clean drinking water to 50,000 people in 39 communities east of Pueblo. It was authorized in the 1962 Fryingpan-Arkansas Project Act, but was never built because the expense was greater than the communities could afford on their own. It was revived in 2000 as water quality issues became overwhelming. Federal legislation added a 65% federal cost-share in 2009.

#### 2021 Activity

Reclamation worked toward final design of the first 12-mile reach of the AVC, which includes connection to Pueblo Water's system, delivery to Boone and Avondale, and two chemical injection sites. Reclamation also released an AVC Environmental Assessment at the end of 2021 to reflect changes from the 2013 Environmental Impact Statement.

The Enterprise attempted to secure funding from the American Rescue Plan Act (ARPA) funds from counties and incorporated water providers to assist in design for delivery lines, and in Pueblo County's case, construction.

The District hired GMS engineering consultants to assist in completing community profiles and to help participants prepare their systems to receive AVC water. Discussions began with some participants about consolidation or regionalization of some areas served by AVC.

Reclamation, the District and Pueblo Water began negotiations on a three-party contract that will provide treatment and transmission of AVC water through Pueblo Water's system.

#### 2022 Action Plan

The AVC three-party contract among Reclamation, the District and Pueblo Water will be finalized in early 2022.

The AVC Repayment Contract will be finalized during 2022. An AVC governance structure will be adopted as well.

Reclamation construction of the Avondale-Boone segment of AVC will begin in late 2022.

The Enterprise will complete design of delivery lines for many of the AVC participants.

#### **Strategic Plan Interface**

#### **Budget Fund**

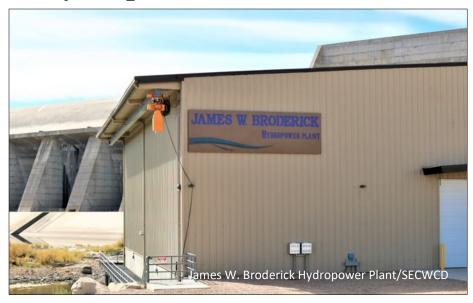

Arkansas Valley Conduit	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Enterprise operating expenditures	\$370,675	\$525,455	\$596,368	\$619,543
Enterprise capital outlay and improvements	\$138,227	\$2,336,859	\$5,822,000	\$12,022,000

# James W. Broderick Hydropower Plant

#### **Background & Purpose:**

In 2019, the District began operating the James W. Broderick Hydropower Plant at Pueblo Dam. The Enterprise operates the Hydro Plant under a Lease of Power Privilege (LoPP), signed by the District and Reclamation in 2017. Power is sold to the city of Fountain and to Fort Carson through Colorado Springs Utilities. Revenues will repay a CWCB loan, and eventually help fund AVC OM&R.

#### 2021 Activity

Power generation was 69 percent of the expected average in 2022, because of low flows throughout the year. Revenues for the first three years of operation are 105 percent of average.

#### 2022 Action Plan

In 2022, mechanical plugs that would allow shutdown of the Hydro Plant for extended periods in the event of an emergency will be manufactured and shipped to the site. The plugs are a requirement of the LoPP with the Bureau of Reclamation. Erosion control, cathodic protection review and other maintenance procedures are planned as well.

#### JWBHP Monthly Power Delivery

# \$250,000 \$200,000 \$150,000 \$50

Revenues from the James W. Broderick Hydropower Plant were 69 percent of the expected average in 2021.

Revenues from electric generation	\$1,026,548	\$1,035,804	\$1,198,719	\$1,214,362

# **Water Sales**

#### **Background & Purpose:**

Along with storage fees, water sales are the primary source of revenue for the Enterprise Activity. The District adopted a new rate structure for 2020, after more than 20 years without a rate increase. The new rates were applied in 2021, and will remained unchanged in 2022. The 2022 Financial Study will include a rate study.

WATER RATES FOR 2022

#### 2022 Action

No change in water and storage rates.

#### 2022 Action Plan

No change in water and storage rates. Rate study planned

#### **Strategic Plan Interface**

#### **Budget Fund**

Water & Storage Sales	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Revenue (Including Surcharges and Return Flows)	\$971,665	\$1,431,498	\$1,432,898	\$1,433,773

# Return Flows

#### **Background & Purpose:**

The District has sold Return Flows from Project water since 1972. Return Flows provide revenue to support the Water Activity Enterprise. Return Flows are generated when the consumptive use of water is subtracted from the amount of water diverted. Municipal & Industrial and Irrigation uses both create Return Flows.

#### 2021 Activity

The Enterprise concluded the Fort Lyon Canal Pilot Program, which investigated ways in which irrigators could claim the first right of refusal, as specified in the District"Allocation Principles. The pilot program began in 2014, when Fort Lyon Canal farmers approached the Board and asked to use Return Flows generated from Project Water applied to lands under the Fort Lyon Canal to augment wells and surface irrigation improvements.

In 2021, the Enterprise determined that water could be allocated on a "farm unit" basis, under administration by the Colorado Division of Water Resources. The Tgwtp'Hqy Policy must be changed in order to allow Return Flows to be used for Rule 10 accounts under the state's 2010 surface irriga-tion improvement rules for the Arkansas River basin, as well as Rule 14 under the 1996 irrigation rules. The changes in the Tgwtp'Hqy Policy determined beneficiaries in an equitable manner that could be administered.

Additionally, the Tgwtp'Hrqy Policy was reorganized to improve understanding.

In December 2021, Enterprise staff reached out to stakeholders to explain the changes in the Tgwtp'Hny Policy to stakeholders at four meetings in all parts of the District.

#### **Strategic Plan Interface**

#### **Budget Fund**

Water & Storage

#### 2022 Action Plan

The Enterprise Board will be asked in March to approve the changes in the" Tgwtp'Hqy Policy to allow Irrigation First Right of Refusal for Return Flows. The new policy will be applied on 2022 Re-turn Flow sales.

Return Flow Sales	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Revenue (budget based on 20-year average)	\$57,892	\$93,168	\$93,168	\$93,168

# **Municipal Carryover Storage Charges**

#### **Background & Purpose:**

Allocation principles allow municipal water to be stored in Pueblo Reservoir for multiple years. There has not been a charge for that, but the cost of service study that was part of the 2019 Financial Strategy and Stability Study recommended that such charges should be phased in over a five-year period.

#### **Past Activity**

Pueblo Reservoir was primarily built to store water brought into the Arkansas River basin until it could be put to beneficial use.

Recognizing the variability of the region's hydrology, it was always intended to fill, release water, and refill again.

Storage patterns by municipalities began to change following the severe drought of 2002, however, municipal users have kept greater volumes of water in storage.

The result has caused a change in the amount of Return Flows, and reduced demand for municipal Project water.

In the Financial Strategy and Sustainability Study, Jacobs Engineering attempt- costs, as well as OM&R for the Project. ed to assign a cost to storage, based on the number of acre-feet stored in Pueblo Reservoir and the "opportunity cost" to the District.

This led to a discussion by the Board of whether that was an appropriate method to use in assigning costs to storage, and how much storage should be charged.

The Board will take up the question of how storage should be paid for in the future.

Under Allocation Principles, only municipalities may carry Project water over for more than one year, and they already bear the costs for evaporation for the time water is stored. However, water in storage that is not being used annually has the potential to create more spill situations and to reduce revenues.

Ad valorem taxes repay construction However, just as users pay annually for water that is imported, there is an appropriate cost for storage beyond the first year for water that is not used.

**Strategic Plan Interface** 

**Budget Fund** 

# **Surcharges**

#### **Background & Purpose:**

Surcharges were added to the Fryingpan-Arkansas water and storage charges throughout the history of the Enterprise. Surcharges serve specific purposes that may change over time. The Board asked staff in 2019 to look at surcharges to determine how they fit into the overall rate structure. The surcharges will be part of the next Financial Study.

#### 2021 Activity

Surcharges were collected on all water sales, return flow sales and storage in the Fryingpan-Arkansas Project. Surcharges were not included in the rate study that was part of the 2019 Financial Strategy and Sustainability Study, and were left as directed by the Board in the diagram to the right.

#### 2022 Action Plan

Surcharges will be collected on all water sales, return flow sales and storage in the Fryingpan-Arkansas Project. Enterprise surcharges include:

Safety of Dams (1998)

**Water Activity Enterprise** (2002)

Aurora IGA (2003)

Well Augmentation (2005)

**Environmental Stewardship** (2014)

The first surcharge was applied in 1998 to cover the District's cost for Pueblo Dam safety work.

An Enterprise surcharge was added in 2002 to fund ongoing projects of the Enterprise.

The Aurora IGA in 2003 included a surcharge of \$10 per acre-foot as part of an agreement that allowed Aurora to obtain a Fry-Ark storage contract.

The well augmentation surcharge covers solesource wells.

The Environmental Stewardship surcharge funds four specific programs.

**Strategic Plan Interface** 

**Budget Fund** 

Surcharges	2021 YTD	2022 Budget	2023 Projected	2024 Projected
Budget based on 20-year averages	\$646,602	\$747,018	\$748,418	\$749,293

# **Pueblo Dam Interconnect**

#### **Background & Purpose:**

The interconnection and Pueblo Dam will connect the North and South Outlets to increase the reliability of municipal water supplies in the event of shutdowns for either maintenance or emergencies. The Interconnect could improve water quality by allowing municipal water providers more variety in elevation from which water is drawn. The 2016 cost estimate was \$16.5 million.

#### **Future Activities**

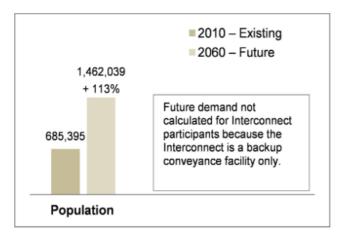

Interconnection of the North and South Outlets at Pueblo Dam would have benefits for both operations and water quality for municipal water providers who depend on Pueblo Reservoir.

The Interconnect was part of a 2013 Environmental Impact Statement that also studied the Arkansas Valley Con-

duit and the Excess Capacity Master Contract. The AVC project is underway, and the ECMC was signed by Reclamation and the Southeastern District in 2016.

During short-term maintenance and emergency situations, the Interconnect would move water between the North and South Outlets at Pueblo Dam. The Interconnect would be a 2.5-mile section of 84-inch pipeline to be constructed between the two outlet works.

Interconnect operations would require a long-term (40-year) contract between

Reclamation and the Interconnect water providers for use during periodic maintenance or emergencies activities.

The Interconnect contract would also support deliveries of water to water connections at Pueblo Reservoir for the Arkansas Valley Conduit, Pueblo Fish Hatchery, Pueblo Water, Pueblo West Metropolitan District, Southern Delivery System, and Fountain Valley Authority.

No plans to build the Interconnect are foreseen in the immediate future.

**Budget Fund** 

# Water Acquisition

#### **Background & Purpose:**

One function of the Southeastern Colorado Water Conservancy District, under state statute, is to purchase water rights for the benefit of stakeholders. The District Board has discussed this possibility in the past, but no action has resulted. There may be situations in the future where the District could purchase water rights to fill gaps in its portfolio.

#### **Future Activities**

The District owns the water rights associated with the Fryingpan-Arkansas Project in both the Colorado River and Arkansas River basins. As a source of supplemental water, there is no "minimum" level of supply.

While the Board has looked at purchasing water in the past, there has not been a true need for an additional supply of water. There have been years when very little water was available for allocation—none at all in 1977 for instance.

At times, the water market outside the Fryingpan-Arkansas Project has been very active, but the Board has never chosen to participate, cities, towns, well associations, other conservancy districts, and even irrigation companies have purchased water rights for varying purposes over the years. The Southeastern District has remained focused on its mission to manage water from the Project, and has not seen the need to expand supplies.

Yet there are scenarios where it would be advantageous for the Enterprise to own water rights beyond those needed for the Project. The availability of water is becoming increasingly critical as Colorado River im-

The Southeastern District has remained focused on its mission to manage water from the Project, and has not seen the need to expand supplies.

ports may be threatened either from a curtailment related to the Colorado River compact or failure of aging infrastructure.

For example, the Allocation Principles allot about 54 percent of Project water to municipalities, but in most years not all of that is claimed. About 14 percent will be available to the Arkansas Valley Conduit when it is complete.

In a dry year, however, the 14 percent may not be enough to meet the needs of the AVC, and more water might have to be acquired. Owning water rights is one way to achieve that,

Purchase of water rights is listed in the Business Plan as a placeholder for decisions by future Boards.

#### **Strategic Plan Interface**

**Budget Fund** 

# **Storage Development**

#### **Background & Purpose:**

A shortage of storage was identified in the 1998 Water Needs Assessment conducted by the District in cooperation with key municipal stakeholders. Sites throughout the Arkansas Valley were identified and prioritized, leading to the Preferred Storage Options Plan. The need for storage remains, but the pace has changed as water conservation practices are implemented.

PROJECTIONS	Population	Water Use
1998 (Actual)	620,917	148,114 af
2019 (Actual)	893,261	165,682 af
2020 (Low Projection)	973,927	213,572 af
2020 (High Projection)	1,107,661	<b>244,072</b> af
2040 (Low Projection)	1,192,598	243,470 af
2040 (High Projection)	1,626,678	335,013 af

Population and water demands foreseen in 1998 overestimated the rate of growth and need for new water supplies.

The outcome has

total water use despite

an increase in popula-

been a reduction in

#### **Future Activities**

Two factors have lowered the M&I demand projected in the 1998 Water and Storage Needs Assessment:

- Population growth: While El Paso and Chaffee counties have significantly increased population since 1998, growth has been slower than projected in Pueblo and Fremont counties. Counties east of Pueblo generally lost population.
- Conservation: Per capita water use, particularly in El Paso and Pueblo counties, has dropped significantly.

The 1998 study was completed at the end of two decades of the largest population growth and wettest weather on record in the Arkansas River basin.

In addition, growth rates in the region were higher overall (about 47 percent from 1980-2000) and particularly in El Paso County (68 percent from 1980-2000). In the 2000-2017 period, growth overall has slowed to 26 percent, and El Paso County to 34 percent.

During the severe drought of 2002, many communities were on water restrictions.

Following the drought, there was an increase in active conservation programs by cities within the District. There was also direction from the Colorado Water Conservation Board to conserve water, and it was included as a statewide goal in the 2015 Colorado's Water Plan.

tion.

Many residential customers have reduced water use on their own as a response to drought or pricing. For instance, a study by Pueblo Water found water use decreased by about 17 percent from 1996-2007. Fountain water users cut back on use when rates increased as a result of Southern Delivery System.

The outcome has been a reduction in total water use despite an increase in population. However, there will be a need for more storage in the future.

**Budget Fund** 

# John Martin Reservoir Storage

#### **Background & Purpose:**

The U.S. Supreme Court battle between Kansas and Colorado over the Arkansas River Compact ended in 2009, opening the possibility that the largest reservoir in the Arkansas River basin could be open for excess-capacity storage for certain Colorado entities. The Arkansas River Compact Administration is deliberating, but has made no decision.

Storage categories in-

flows, fully consumable

flows from the Fry-Ark

Project, and capturing

releases from Pueblo

Reservoir to avoid

clude augmentation

#### **Future Activities**

John Martin Reservoir was completed in 1948 as the regulating reservoir for the Arkansas River Compact between Kansas and Colorado.

The Compact was signed by both states and ratified by Congress shortly after completion. After a 24-year Supreme Court battle ended in 2009, the Arkansas River Compact Administration (ARCA) again began talking about the possibility of opening accounts for Colorado users in John Martin Reservoir.

John Martin Reservoir often has excess capacity space, filling to its conservation and recreation storage capacity of 341,000 acre-feet only during extremely wet years.

In 2015, the Colorado Water Conservation Board asked the Lower Arkansas Valley Water Conservancy District to sponsor a feasibility and scoping study. Deere & Ault Consultants completed Phase I of the study in 2017. Nine groups, including the Southeastern Colorado Water Conservancy District, have expressed an interest in using John Martin for storage.

Others include four augmentation groups, the cities of Lamar and La Junta, the Lower Arkansas District, and Tri-State Generation & Transmission

Co. Tri-State owns about half of the Amity Canal shares, and Amity stores some water in John Martin now.

The study identified benefits for Colorado and Kansas. Storage categories include augmentation flows, fully consumable flows from the Fry-Ark Project, and capturing releases from Pueblo Reservoir to avoid spills. Kansas would receive a five percent storage charge (in water), reduce evaporation on its water, and receive better quality water.

Phase II of the study will be to provide a draft proposal of the study to Kansas for review, recommend changes in the 1980 Operating Plan and accounting system, and present the plan to ARCA.
